[ACS Sample Test]

1. Which of the following is a good explanation of MMDB?

(1)High-capacity DBMSs can be implemented

(2)The index is created on Disk

(3)It is suitable for use of long-term archival data

(4)The average processing speed is very fast

2. Which of the following DML commands is not supported by the other DBMS?

(1)Insert

(2)Update

(3)Delete

(4)Move

3. Fill the blank below

Periodical ( ) saves the time of recovery in the event of system failure.

(1)checkpoint

(2)restart recovery

(3)MVCC

(4)commit

4. Which of the following scripts connects to iSQL of ALTIBASE HDB without additional options?

(1)connect

(2)iloader

(3)isql

(4)is

5. Which of the following is a backup file or memory tablespace?

(1)Loanchor

(2)Checkpoint imagefile

(3)Index

(4)Redo logfile

6. Which of the following commands checks the version of ALTIBASE HDB?
(1)altibase -h
(2)altibase -p
(3)altibase -b
(4)altibase -v

7. Which one of the following explanations is correct about modifying database mode in ALTIBASE HDB?
(1)Any user can modify the database mode.
(2)It can be modified at the PROCESS stage.
(3)ALTER DATABASE ARCHIVELOG; command changes the database mode into archive mode
(4)It can be modified at SERVICE stage when the database is started up.

8. Fill the blank below.
( ) is a tool for supporting automated data migration.
( ) stores the logical structures and data in text format, and automatically creates a script for use in loading the stored text data into ALTIBASE HDB.
(1)AEXPORT
(2)ILOADER
(3)AUDIT
(4)IS

9. What utility allows a user to store data as a text file?
(1)iLoader
(2)aepxort
(3)sqlloader
(4)bcp

10. Which of the following can be specified in the blank?
"Replication replicates a data of ( ) only."
(1)sequence
(2)procedure
(3)trigger
(4)table
